

Is Mediocre Social Network Apps Incorporated (MSNAI) Stock A Buy?

From a technical perspective, the Mediocre Social Network Apps Incorporated (MSNAI) stock price has been in a downward trend since its IPO in 2015. The bears are in full control and there is no sign of trend reversal. We expect the stock price to steadily decline in the future.

Looking at previous price actions, there has been a bounce during every Q2. In 2019, the correction has already been made, and we expect the stock price to continue following the bearish movement without too much volatility and reaching new lows. Unless we see positive fundamental news, we hold off on buying.
